INTERNSHIP EXPERIENCES

MERN STACK Internship	2025
Built a full-stack Habit Tracker Web Application using MERN, enabling habit tracking and management. Designed RESTful APIs, developed responsive React UI, and handled MongoDB data with end-to-end deployment experience. Certificate	
JAVA FULLSTACK Internship	2025
Implemented a Telemedicine App using Spring Boot and React with JWT-secured APIs for booking, scheduling, and admin management. Integrated frontend and backend, gaining experience in databases, debugging, Git, and deployment.	

PROJECTS

DeafAlert – Personalized Sound Event Detection System	2026
Designed a real-time AI system to detect and classify 20+ household sounds with localization and emergency prioritization. Optimized for low-latency offline inference on mobile devices. Tech Stack: Python, TensorFlow, CNN-LSTM, Few-Shot Learning, TensorFlow Lite	
Digital Inclusion & Workforce Readiness System	2026
Architected a modular web app to assess student readiness using ML-based classification, resume parsing, and profile verification. Developed a trust-based scoring system with personalized roadmaps and placement prediction.	
Tech Stack: Python, Flask, SQLAlchemy, Scikit-learn, Joblib.	
DocuMind – AI-Powered Document Intelligence System	2026
Developed a scalable RAG-based platform for semantic search, multi-document Q&A, and insights from unstructured data using hybrid retrieval and knowledge graphs. Tech Stack: Python, Streamlit, FAISS, BM25, Sentence-Transformers, Gemini API.	
AI-Based Digital Manipulation & Persuasion Detector	2026
Engineered an AI-powered system to detect psychological manipulation in text using NLP, ML, and Transformer models, with explainable insights and counter-persuasion strategies. Tech Stack: Python, NLP, Scikit-learn, BERT, NLTK, Streamlit.
